EDUCATION

2023 - 2026

GOVT. PG COLLEGE BARWANI

- Bachlor in computer science

SKILLS

Frontend Technologies
- React.js (Functional Components, Hooks, Routing)
- HTML5, CSS3
- JavaScript (ES6+)
- Tailwind CSS
- Responsive Web Design
- React Router DOM
- Form Handling and Validation

Backend Technologies
- Node.js
- Express.js
- RESTful API Development
- JWT Authentication
- Middleware Implementation

Database & Tools
- MongoDB with Mongoose
- Postman (API Testing)
- Git & GitHub (Version Control)
- VS Code (Editor)
- Vercel & Render (Deployment)

Other Skills
- Problem Solving
- Team Collaboration
- Communication Skills
- Debugging & Error Handling
- Learning Attitude & Time Management
- AI-Assisted Development using tools like ChatGPT, Cursor, and GitHub Copilot

LANGUAGES

- English: Proficient in Reading and Listening, Basic in Speaking
- Hindi: Fluent (Speaking, Listening, Reading & Writing)

PROFILE SUMMARY

Currently pursuing a 7-month Full Stack Web Development Internship at Developers Point, Barwani, where I'm actively working on live industry-level projects and gaining real-time experience in professional web development.

A highly motivated and skilled Full Stack Web Developer with practical experience in designing and developing dynamic web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js). Proficient in both frontend and backend development, with a strong command of modern tools like Tailwind CSS, RESTful APIs, and responsive UI design.

Demonstrated ability to handle end-to-end development — from creating intuitive user interfaces to building robust backend logic. Passionate about learning, problem-solving, and delivering clean, scalable code that adds real value to users and businesses.

I also use modern AI-powered tools like ChatGPT, Cursor, and GitHub Copilot to boost productivity, write clean code faster, debug effectively, and explore better solutions during development.

WORK EXPERIENCE

Full Stack Developer Intern   Jan 2025 – Present

Developers Point, Barwani

- Contributing to live full-stack web applications under professional supervision.
- Developing frontend interfaces using React.js, HTML, CSS, JavaScript, and Tailwind CSS.
- Building and integrating RESTful APIs using Node.js and Express.
- Working with MongoDB for backend database management.
- Collaborating with team members on project planning, testing, and deployment.

PROJECTS

Event Managment

A full-stack web application that allows users to create, manage, and register for events. Admins can add/edit event details, and users can view events based on categories.
Implemented user authentication with JWT for protected routes.
Designed responsive UI using Tailwind CSS and React components.
Developed backend APIs for events, categories, and user management.
Integrated filtering and search functionality on the frontend.

Doctor Finder and Scheduler

SarDoc is a complete doctor appointment booking system where patients can register, browse available doctors, and book appointments based on time and date.
Built secure authentication and role-based access for patients and doctors.
Created booking logic and appointment scheduling system in the backend.
Used React Router for protected patient dashboard and doctor panel.
Stored and fetched medical data using MongoDB with Mongoose ORM.
Deployed backend APIs and tested them with Postman.
